## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:
  - I. Claims 1-8 and 12, drawn to a method for generating autologous thrombin, classified in class 530, subclass 424, and class 424, subclass 94.64.
  - II. Claims 9-11, drawn to autologous thrombin and a composition for extracting thrombin from plasma, classified in class 424, subclass 94.64.

2. The inventions are distinct, each from the other because of the following reasons:

The process of Invention I and the product of Invention II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the thrombin can be prepared by another method such as by adjusting the ionic strength of the blood and the pH of the plasma to cause precipitation of the thrombin component for resolubilization as described in the specification (page 4, lines 8-9).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and different classification, and because Inventions I-II require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Robyn Carrillo on March 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
